AC-48000

MARINE CORE PACKAGE FOR SYSTEM OIL & TRUNK PISTON ENGINE OIL ADDITIVE (TPEO)

AC-48000 is a core package designed for use in combination with AC-4858-2 or AC-4858-1.

Application

In combination with AC-4858-1, system oils for marine with good extreme pressure performance required in bearings and gear train of low speed two stroke engines can be blended.

In combination with AC-4858-2 high quality with low oil consumption trunk piston engine oils for modern marine and powergen engines can be blended.

Typical Characteristics.

Characteristics	Typical Value
Appearance	Brown Viscous Liquid
Density @ 15°C, g/cu.cm	0.983
Viscosity @ 100°C, cSt	34
Flash Point, COC, °C	200
Phosphorus, mass/wt%	3.4
Zinc, % weight	4.01
TBN, mg KOH/gm	0.67

Storage & Handling.

Recommended maximum blending temperature is 60°C. For best results in blending, add first VI Improver and then DDI packages.

Packaging.

200 ltr drum
Bulk ISO

Progress to Zero Emissions
